**Medical** microbiology. General and special virology: A Textbook / N. N. Popov, S. G. Malanchuk, E. S. Sanina, E. V. Ognivenko, J. O. Grechishkina, T. I. Lyadova, O. V. Volobueva. – Kharkiv : V. N. Karazin Kharkiv National University, 2014. – 132 p.

In this textbook we have attempted to meet the need for condensed and readily accessible information about viruses as agents of human disease. We hope that this book will provide useful information for all health-care professionals, in particular practising physicians, medical and nursing students, interns and residents.

The pictures and schemes will hopefully entertain as well as provide a helpful visual image of some salient points.

# Contents

## Part 1 Lectures

Preface .....	4
Lecture 1. Virology. Introduction .....	5
Lecture 2. RNA Viruses. Orthomyxoviridae. Paramyxoviridae .....	13
Lecture 3. Picornaviruses .....	24
Lecture 4. DNA-viruses. Herpesviridae. Adenoviridae .....	29
Lecture 5. Retroviridae .....	47
Lecture 6. Hepatitis viruses .....	54
Lecture 7. Slow virus infections. Prions .....	60

## Part 2 Practice

Subject 1. Introduction to virology. Virus structure. Antiviral drugs .....	67
Subject 2. Virus cultivation. Virus quantification .....	77
Subject 3. Other laboratory techniques used in microbiology, virology and immunology .....	81
Subject 4. Family Orthomyxoviridae .....	97
Subject 5. Family Picornaviridae .....	100
Subject 6. Retroviruses. HIV .....	104
Subject 7. Family Herpesviridae .....	109
Subject 8. Family Adenoviridae .....	118
Subject 9. Hepatitis viruses .....	119
Inference .....	126
Questions for self-control .....	127
References .....	130
